

MCTWare.com is a Web enabled solution, giving you the flexibility you need to control your MCT publishing. Where is my data? How current is it? Has it been updated correctly? These are questions you should not have to ask. By direct data entry and publishing to your list, you have complete control.

- Free independent solution
- Web enabled for global access
- Secure SSL encryption
- Maximum control: Immediate publishing of changes to your distribution list.
- Minimize costly mistakes: Single data entry system with multi point access.
- MCTWare will a propagate your current MCT table for you
- Try it! [www.MCTWare.com](http://www.MCTWare.com)

#### Web-based Access

MCTWare provides easy access to your MCT data via the Internet on an independently hosted system. With FREE access to MCTWare you can take total control of your critical data wherever you are. You will need Netscape Navigator or Internet Explorer version 4.0 or higher to access and use this free service.

#### Shared Access

MCTWare allows multiple users for each airline. The secure password used to create the initial account is the key to shared access to your data. Eliminate multiple messages to change multiple systems. Do it once, and know it is published correctly.

#### Guest Access

You control who sees your MCT files. MCTWare allows you to authorize a guest account to review your MCT data. Your Guest is not allowed to create, delete, or modify your data.

#### Secure

Your airline's MCT data is protected against outside users by use of a user name and password to authenticate access. All communication between your web browser and the MCTWare site is protected via the de facto SSL encryption technique.

#### Publishing Lists

Publish as often as you wish to one of many E-mail addresses. This list of addresses is saved with your account information so that you don't have to retype the addresses each time you want to publish your data. What is published is for the first time under your complete control.

#### Multiple Output Formats

MCTWare is XML enabled allowing dynamic updating through one source, eliminating the time consuming task of multiple site reporting and verification. Additional publishing formats are available: plain text file, an HTML table, or a comma separated value (CSV) for easy import into spreadsheets or databases. What format you deliver in is your choice.

#### User/Data Preferences

MCTWare allows you to customize your data entry screens. After fields have been disabled, they will not be displayed when entering data, searching, or displaying your data. If your needs change, you can always enable fields. Need a custom field just let us know.

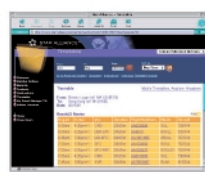

As an additional service MCTWare will a propagate your current MCT table for you. Log onto [www.MCTWare.com](http://www.MCTWare.com) to find out more.
